Methodological Approach

Main Results

general results

general results

Federal to transmission and only the second and only

Limitations and Discussion

Nature of the WTZ agreements;

 evaluation only interpretable within context of the whole portfolio of intervention

Quantitative;

probability sampling

types of recipients

Qualitative:

sample size

sample structure

Evaluating the "WTZ" Programme

Research Question

- How relevant are WTZ projects for intensifying the international scientific cooperation?
- How effective are WTZ projects in terms of concrete scientific output?
