Implementation, Monitoring and Evaluation of Transformative Innovation Policy in Austria

Revaluation Conference 2024

Henriette SPYRA, Director General for Technology and Innovation
Austrian Federal Ministry for Climate Action, Environment, Energy, Mobility, Innovation and Technology

Directorate General „Innovation and Technology“ (Applied Research)

- **Responsible for Technology and Innovation Policy and the respective budget chapter in Austria**
- **Support of companies to develop innovative solutions. Companies often collaborate with research organisations**
- **RTI Pact 24-26 5,2 Billion EUR, thereof 36% of the RTI Pact budget is for applied research**

Budget allocation "RTI promotion & beyond"

Overarching Goals

Shaping Austria for the future together through transformative and effective RTI:

Shaping the green and digital transformation with R&I by developing and demonstrating technologies and system innovations for **climate neutrality**.

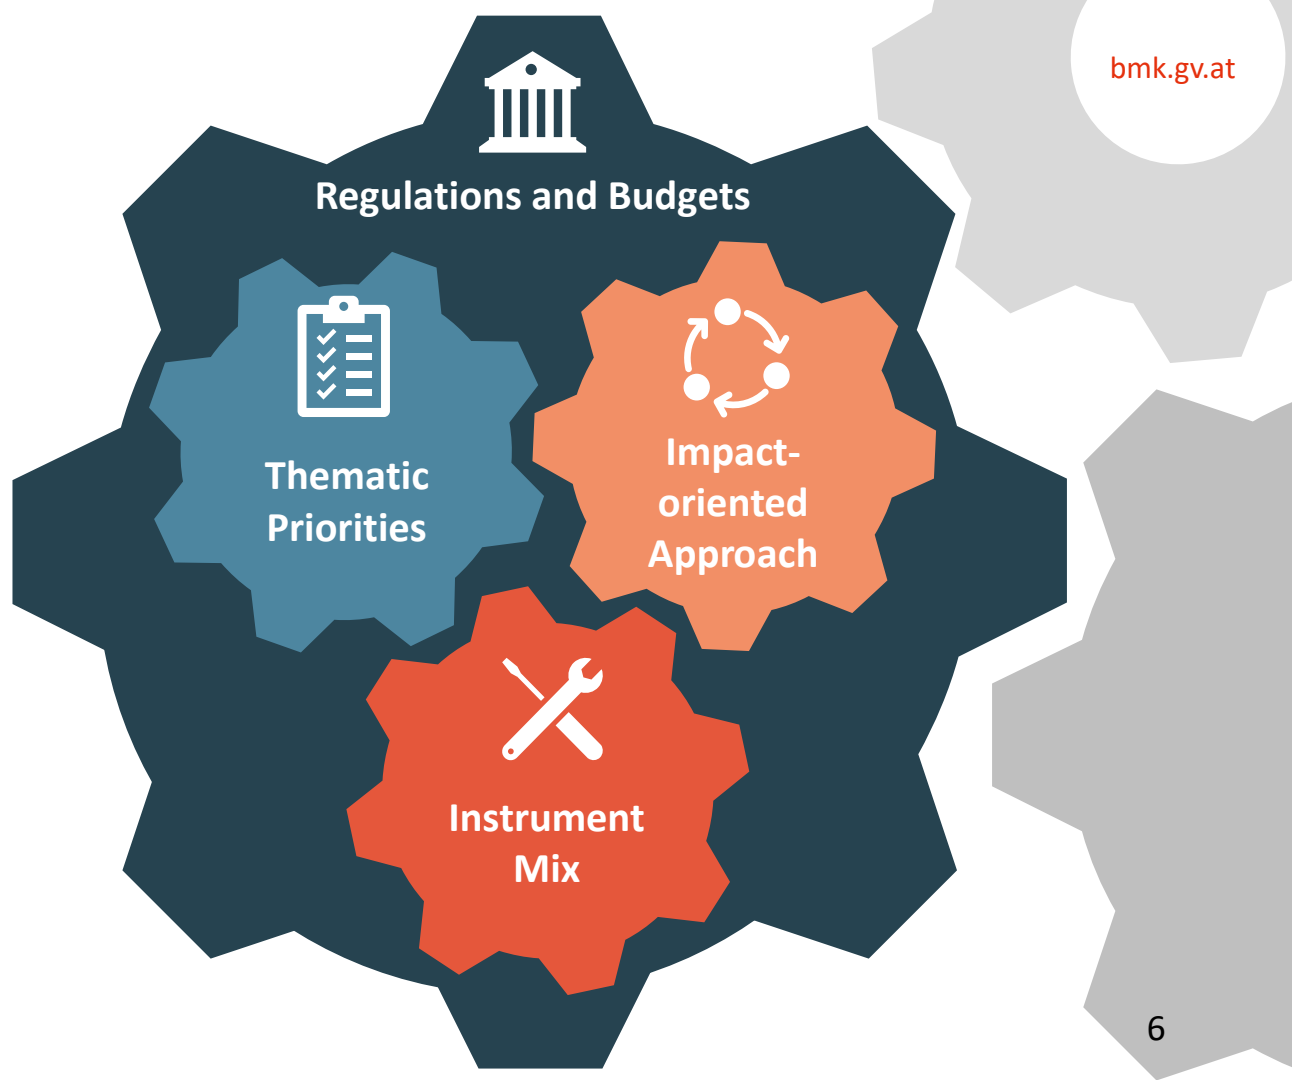

Advance **competitiveness and technological sovereignty through targeted identification** and realisation of innovation chances in the development of key technologies.

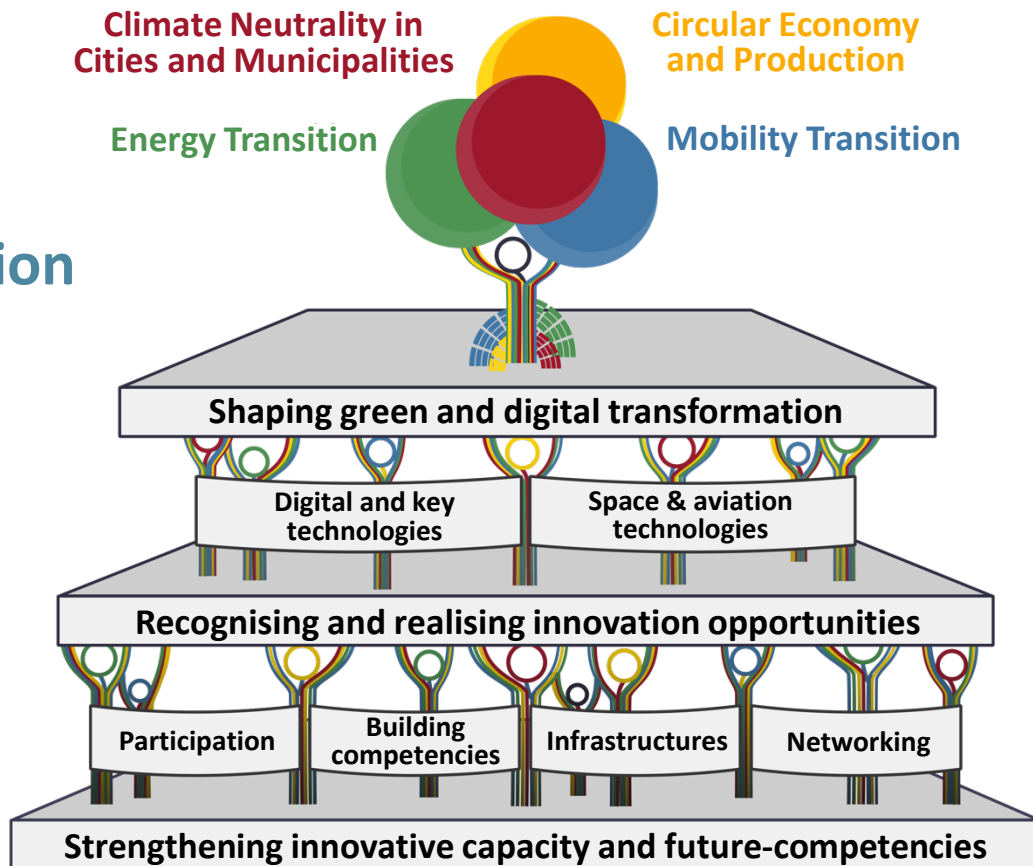

Strengthen **resilience, security and well-being** by building innovation capacity and future competences in the business sector, research organisations and multipliers.

How is transformative innovation policy implemented in the BMK?

Research, Technology Development & Innovation

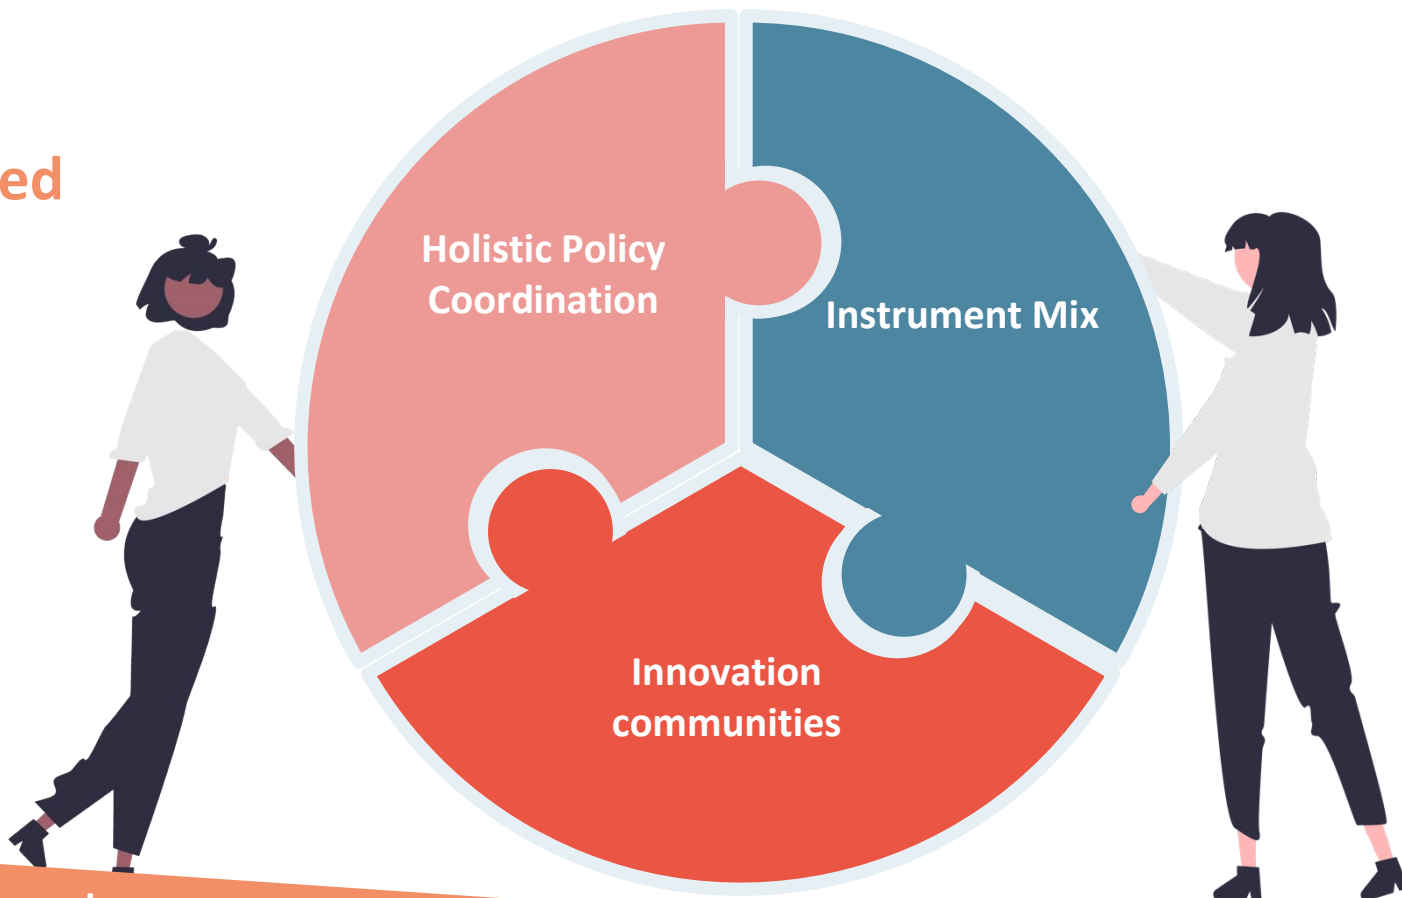

for a green and digital
transformation of the Austrian
economy and society.

The EU and International Cooperation

Impact-oriented Approach

Transformational Innovation Policy

Innovation Labs

→ long-term spaces for learning and experimenting

Public-Public Partnerships

→ Foster innovation capacities of public institutions,
e.g. city administrations

Regulatory Sandboxes

→ Research and innovation projects outside
the existing regulatory framework

Innovative large-scale Projects

→ Combining STI funds with investment funds,
e.g. for transformation of industry

Examples for new Approaches for Monitoring and Evaluation

1. **Piloting of Monitoring across all RTDI activities**
2. **New approaches to measure contribution of RTI activities to Green Transition**
3. **New measures to steer and monitor basic funding for Research and Technology Organisation**

Piloting of Monitoring across all RTDI activities

Indicators and Niches I

Objectives	What is already available?	What is missing?
Competition and sovereignty	<ul style="list-style-type: none"> • 4 (EU/International) • 3 (Start-Ups) • 2 (utilization) • 3 (Property right and patent applications) • 1 (competitive position) • 3 (secondary statistics) <p>→ 16 indicators</p>	<ul style="list-style-type: none"> • Key technologies • Support of industry • Meta-analysis on economic effects
Climate neutrality	<ul style="list-style-type: none"> • 1 (SDGs) • 1 (contribution to taxonomy) • 2 (Patent publications for environmental technologies, Share of the sector's R&D in the environment-related production value) <p>→ 4 indicators</p>	<ul style="list-style-type: none"> • System innovations
Resilience and well-being	<ul style="list-style-type: none"> 3 (Cooperation) 2 (new funding recipients) 3 (jobs/project positions) 1 (Involvement of users) 1 (Publications) 4 (secondary statistics) <p>→ 14 indicators</p>	<ul style="list-style-type: none"> • Meta-analysis of jobs created

Indicators and Niches II

Objectives	What is already available?	What is missing?
Equality	➔ 12 indicators on working hours performed by women and women in management positions in relation to AWS, FFG, AIT and SAL + secondary statistics	
Communication/ dissemination	➔ 2 Indicators for BMK events	• project results

New approaches to measure contribution of RTI activities to Green Transition

New Approaches

- Strengthen **„RTI for green transition“** in one of the impact objectives
- **Define indicators** tracking the new impact objective
- **Set-up 4 RTI transformative missions** addressing green transition
- Implementing/Strengthening of **„sustainability criteria“** in the FFG project evaluation
- **Self-declaration of completed/incoming projects** whether they could contribute to the six environmental objectives of the **EU-Taxonomy and SDG**
- **pilot cases for „Green Budgeting“**
- Piloting a **formative evaluation for the Mission Climate Neutral Cities** in 2024

New measures to steer and monitor basic funding for Research and Technology Organisation

Milestones for implementing impact monitoring of RTO funding

- **2020 Research Financing Act:** adoption of RTI-Pact => **funding agreements for 3 years** with central institutions, incl. RTOs
- Agreements define objectives, priority measures and **key performance indicators**
- **Monitoring Meetings twice a year** to discuss progress and impact
- First steps in further development of monitoring and impact evaluation:
 - quality assurance of KPIs and consistent data collection within RTO
 - Further development of stronger indicators (transfer, impact)
 - Collection of impact stories and plan for impact study from RTO vs. confidentiality requirements of companies
